PROJECTS

Henotic Solutions-Employee Promotion 📁 | Machine Learning **July - September,2023**

- Developed a machine learning model to predict employee promotions within the organization.
- Utilized various machine learning algorithms, such as logistic regression and random forest for predictions
- Project resulted in improved transparency and fairness in the promotion process, leading to increased employee satisfaction and optimized talent utilization within the company.

Spotify Clone 📁 | HTML,CSS,Java Script

- Implemented essential playback features including play, pause, forward, and volume control to enable seamless music listening experience.
- Integrated functionality to access and play songs stored locally on the user's device, offering a convenient way to enjoy custom playlists without relying on external servers.

Movie Rating 📁 | React ,API

- Designed and developed a rating application resembling IMDb using HTML, CSS, JavaScript, and APIs, hosted on Netlify
- Implemented user-friendly features for rating, reviews, and dynamic content retrieval, showcasing proficiency in web development and cloud deployment.

Ecommerce 📁 | React JS ,Express JS ,Node JS ,MongoDB

- Developed a full-stack e-commerce site using MongoDB, Express.js, React.js, and Node.js. Implemented user authentication, dynamic cart management, and an admin panel for product management.
- Deployed the frontend on Netlify and backend on Render. Ensured secure login, personalized user experience, and real-time updates.

HOBBIES

• Reading Books • Playing Games • YouTube Facts Channels Enthusiast
